Merlot

California

**Type** – Merlot

**Region** – Central Valley

**pH:** 3.78 | **TA:** 6.6 | **RS:** 8.84 g/L | **ABV:** 13.6%

## About Crosby

Crosby Cellars gets its fruit from California's Central Valley, in roughly equal parts between the Sacramento and the San Joaquin Valleys. Despite the Central Valley being responsible for producing more than half of California's wine grapes, there is no Central Valley AVA. All Crosby Cellars wines are fermented in stainless steel, and the finished products are blended with a touch of Lodi wine to add flavor and character.
